Coven
maisonc.com

"All of the illustrations are hand-drawn and painted by Costanza Theodoli-Braschi. There's something powerful and feminine simultaneously going on here. Perfect for a powder room or foyer."

Ink Blots
porterteleo.com

"Wallcovering by artist Kelly Porter and interior designer Bridgett Cochran. Handprinted and handpainted on Japanese rice paper. I was immediately drawn to Ink Blots for its bold, global aesthetic and organic design. I installed Ink Blots in our bedroom. This paper completely transformed our space! No two ink blots are alike. Designers can collaborate with Porter Teleo to custom design the wallpaper in any color palette one can dream up."

Flora
calicowallpaper.com

"Flora reminds me of the landscape at the High Line park. It's a unique, contemporary spin on floral wallpaper. I selected Flora for a traditional NYC dining room and love the way it added excitement and so beautifully tells a story."

Willow
calicowallpaper.com

"This paper has a meditative quality to it, like a combination of water and trees. The gentle infusion of metallic is truly spectacular. When the sun hits the gold Mylar, it's magic. I installed this as an accent wall mural for a special client."
